

Junior Data Scientist / Data Analyst

Brisbane Inner Suburbs

Talenza has been engaged to identify talented Data & Reporting Analysts for multiple permanent roles within the inner suburbs. We are excited to be working with this team as they continue to grow and provide exciting career opportunities in a fun and energetic workplace.

Our client is a growing organisation with a strong reputation in the QLD Market they are looking to add capability and maturity to their growing Analytics team. Your new role will offer you a chance to join a creative and supportive team invested in your success and will provide everything you need to hit the ground running in 2020.

Your New Role:

- Use your skills in Data Analytics and work collaboratively with both tech and business stakeholders to provide valuable insights which support the greater team and business.
- You will need to precisely analyse, investigate and mitigate inconsistencies & variances in data across reporting and dashboards.
- Your new role will allow you to be rewarded in showing drive and initiative in up -skilling your knowledge in new and existing technologies. The work environment acknowledges team members showing an interest in self-development and improvement.
- Demonstrated understanding of team dynamics & culture and a desire to improve collaboration & team effectiveness

Required Skill Set:

- Proven experience & track record across SQL Server tooling including PowerBI & SSRS with strong competency in TSQL.
- Skill and passion for reporting and data analytics
- Data integration experience across both BAU & Project initiatives.

Please apply to register your interest or contact Rory Gove at Talenza via LinkedIn for a quicker response. You Must have a relevant visa to work in Australia.
