

Arkose Labs is a fast-growing startup that is disrupting the fraud industry by putting the control back into the hands of digital businesses with an innovative approach that bankrupts the underlying business model of fraudsters. Its patented platform combines Telemetry with an Adaptive Step-Up challenge. Telemetry accurately identifies bad actors, while the Adaptive Step-Up wears them down and diminishes their ROI without adding friction for good customers. The world's largest brands trust Arkose Labs to protect their customer journey while delivering unrivaled customer experience.
